Education

Universidad Autónoma del Estado de México

2017-2022

Computer Engineering

Experience

Minsait

CDMX

Frontend Developer

August 2022 – Actually

I have been working in the banking sector in two projects for BBVA Mexico (Investments and credits for Pymes), using html, css, javascript, web components, lit element. I helped to create web apps to help the customers in their daily life, and had solutions in their finance.

Leadership & Activities

Google Developer Student Club CU UAEM Valle de México

Mexico, Atizapan

Leader

August 2021 – July 2022

This community was the first scholar community in the Estado de México.

I helped to organize different events in technology for Google with Google Developer Experts of Latam, and I was also a speaker at technology events in other universities like Universidad Veracruzana, GDG Orizaba, and Universidad Católica Boliviana.

During this time I learned abilities like leadership, planning events and team work.

Google Developer Student Club LATAM

Mexico

Organizer

August 2021 – July 2022

I helped to organize a team with other GDSC leads of Latin America where we did different types of events for example the International Women Day, GDSC Latam Conference, Android Study Jam, speaker sessions, interviews with other developers, info sessions.

In this community I met other developers from different countries so that I could grow my contacts and learn to work with incredible people .

Google Developer Group Atizapán

Community Leader

June 2023 – Actually

Atizapán México

I'm co-founder and lead organizer in GDG Atizapán one of the first in the Estado de Mexico,
